

Introduction to Product Management

Quick ground rules

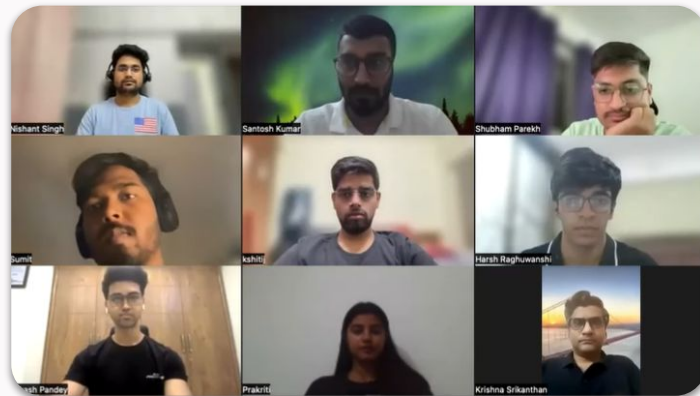

1 Get your videos and audio set up and on.

It ain't fun speaking to names.
Let's see some faces.

2 This will be a highly interactive session.

You may be called to share your point of view at given point. So be ready to chat or speak.

3 I will be taking a QnA breaks in between to answer your questions.

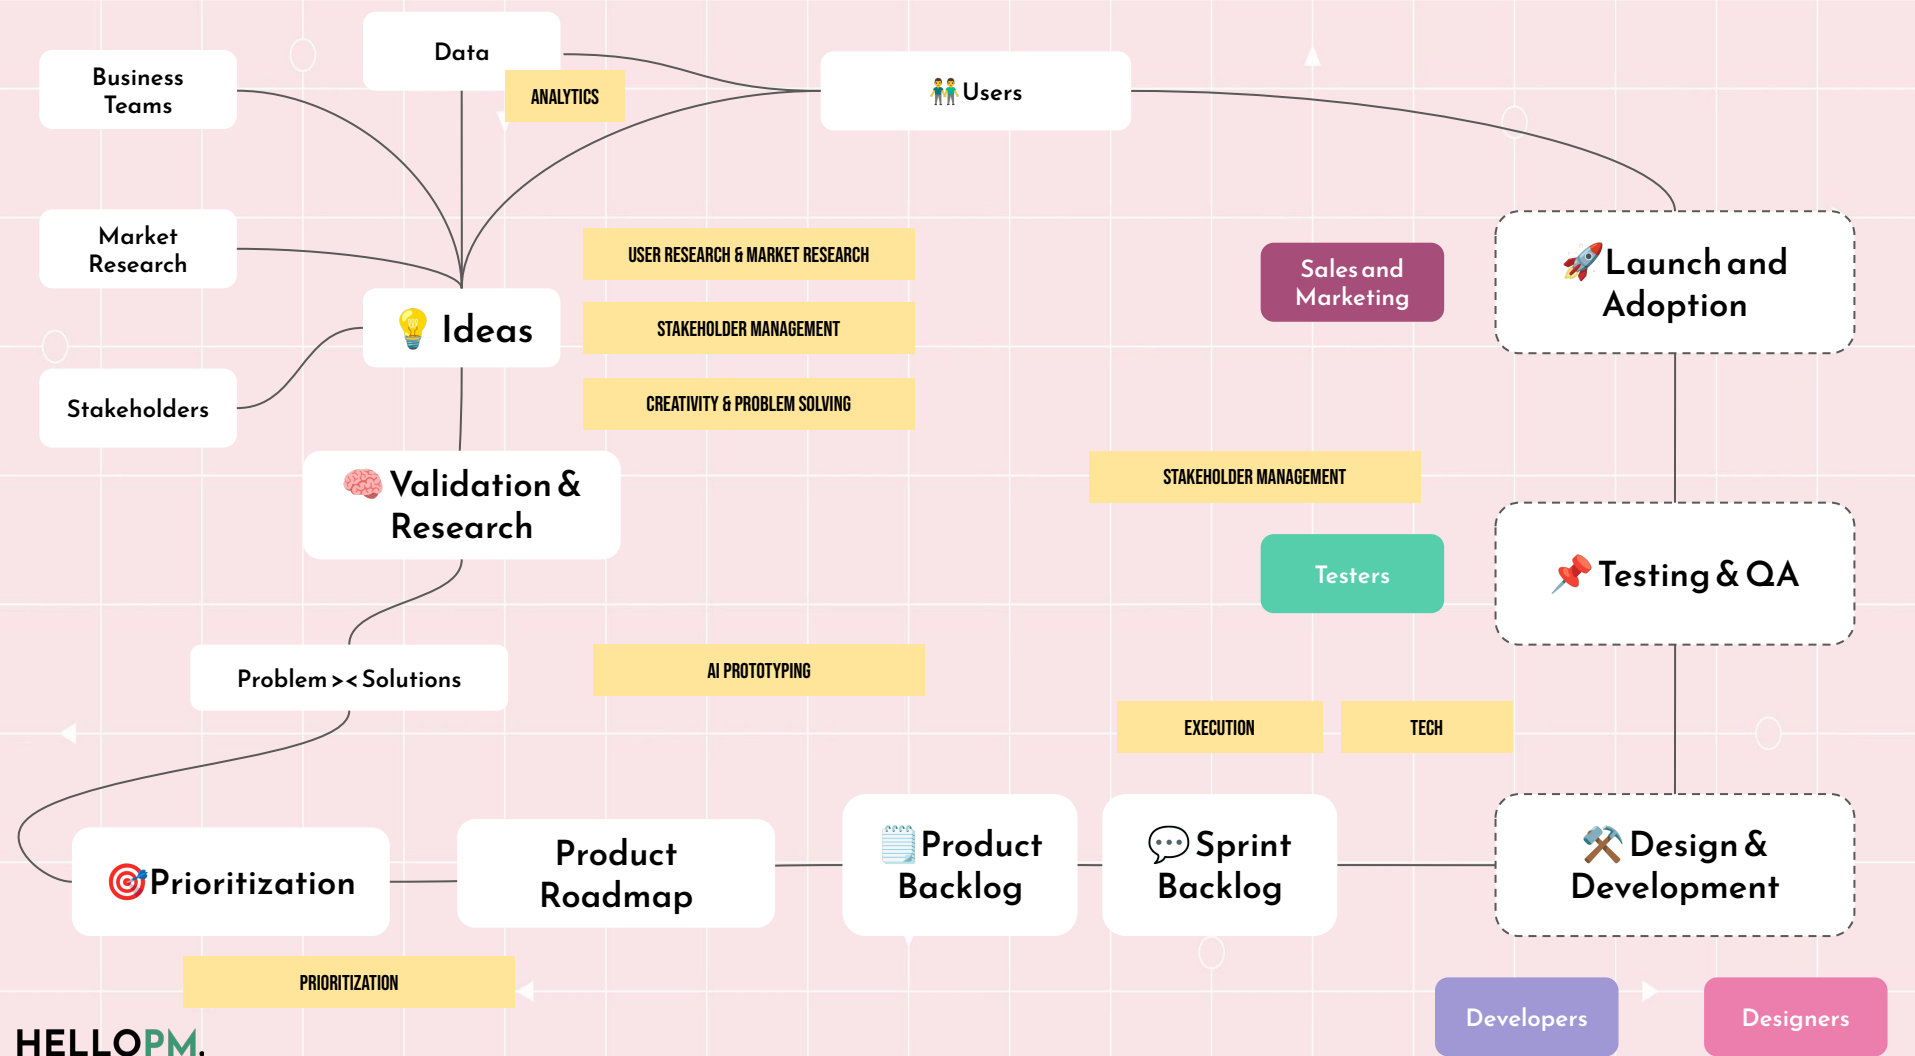

If I can answer your question in 60 seconds, I'll answer immediately.
Else I will answer it at the end of the session or in office hours.

Squeeze the value

ACTIVE RECALL

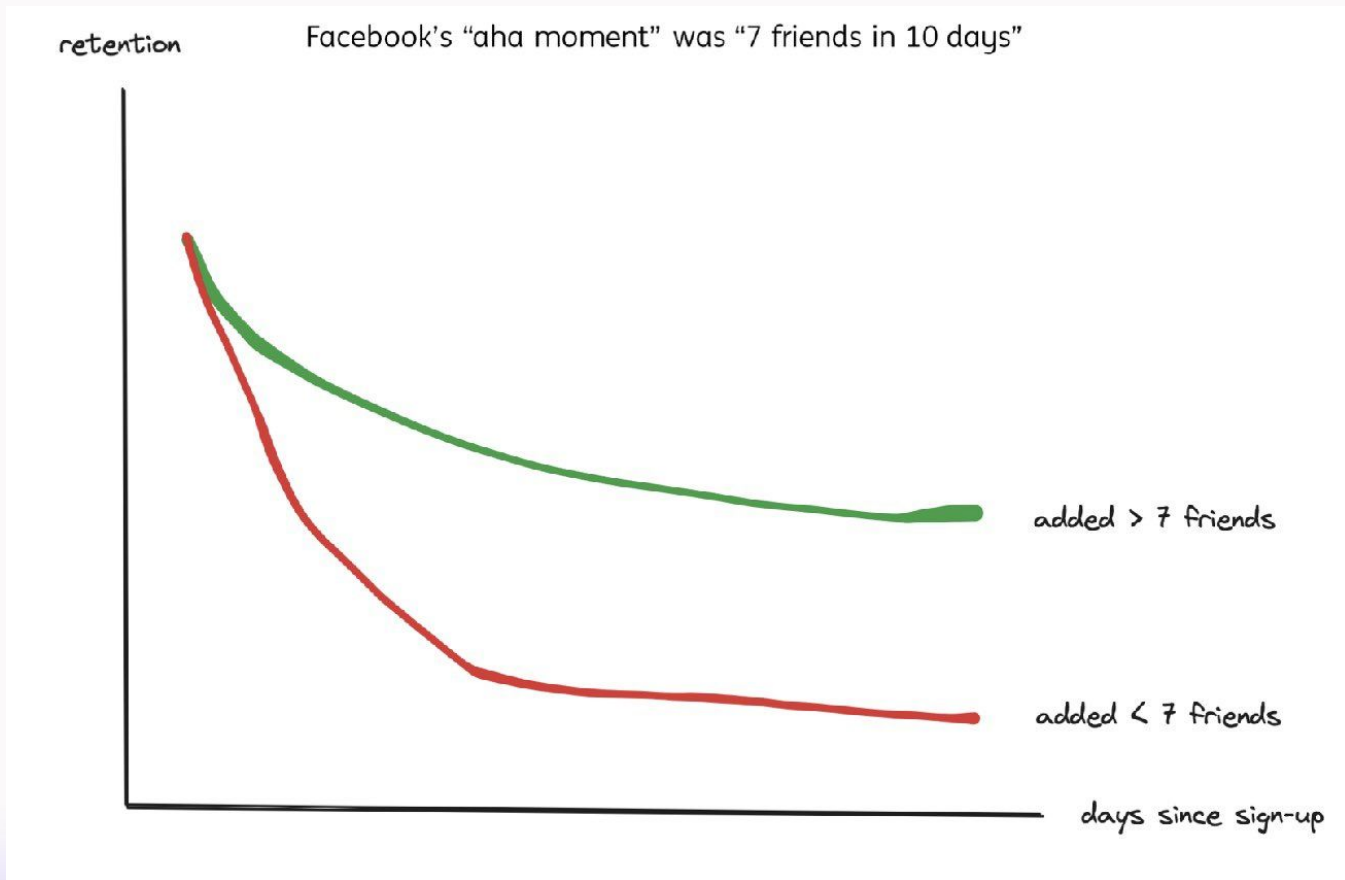

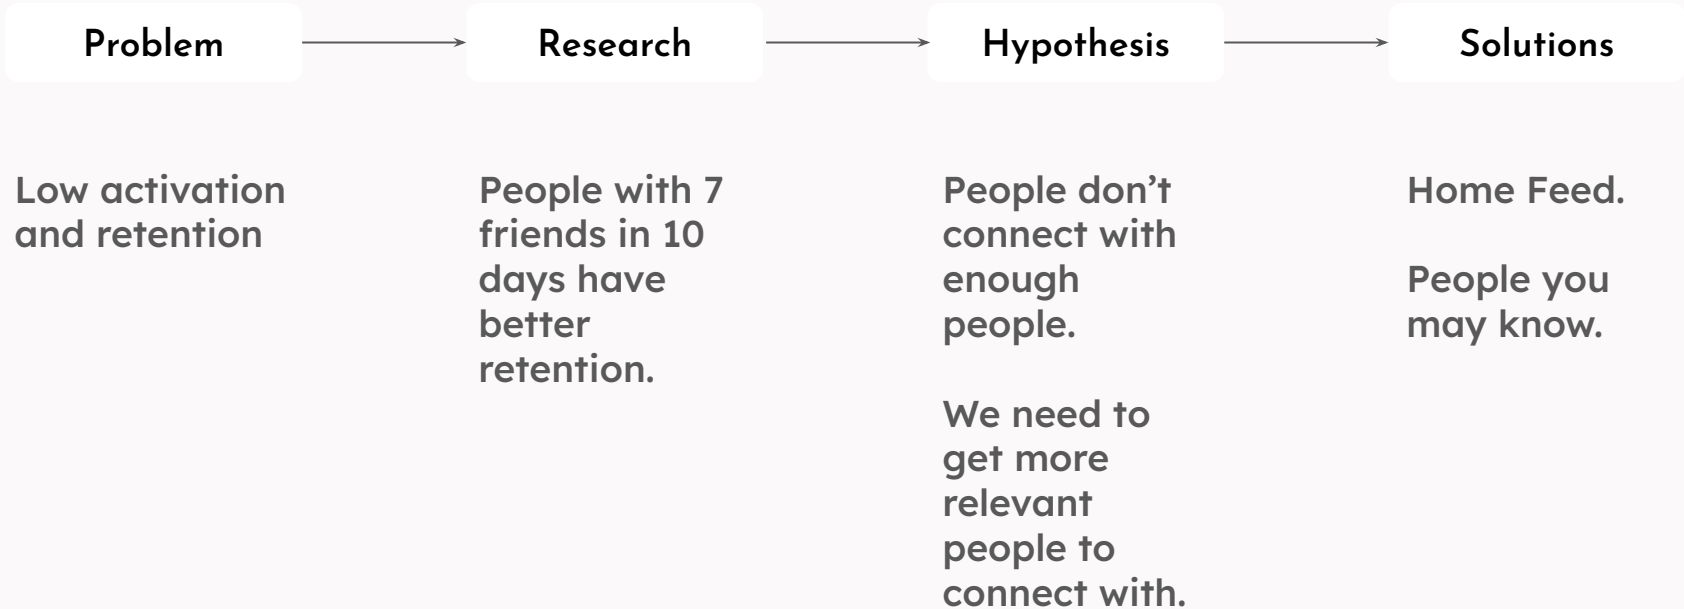

THE GO PRODUCT ROADMAP

 DATE The release date or timeframe	Date or timeframe Q1 2021	Date or timeframe Q2 2021	Date or timeframe H2 2021	Date or timeframe 2022
 NAME The name of the new release	Name/version Rent a car	Name/version Share a car	Name/version Smooth the process	Name/version Become a genuine car rental company

Top 20 Reasons Startups Fail

Based on an Analysis of 101 Startup Post-Mortems

“

**If you don't truly understand
the problem, **you haven't
earned the right to solve it.****

⚡ Product Sense in Action

Product Thinking

“

Accurately predicting what your user and the market will value.

Problem Space

Problem

What is the problem we are trying to solve, and why is it important?

Audience

Who is experiencing this problem, and how does it impact them?

Alternates

What are the current solutions or workarounds, and why aren't they sufficient?

Business

How does this problem align with our business goals, and what is the potential impact of solving it?

Validation

How can we validate that this is a real and significant problem?

Solution Space

Brainstorm

What are the possible solutions to this problem, and how do they address the core issue?

Solution Fit

How will this solution benefit the user, and how does it align with their needs and goals?

Risks

What are the potential trade-offs, risks, or challenges with implementing this solution?

Metrics

How will we measure the success of this solution?

Feasibility

What resources are required to implement this solution, and is it feasible within our constraints?

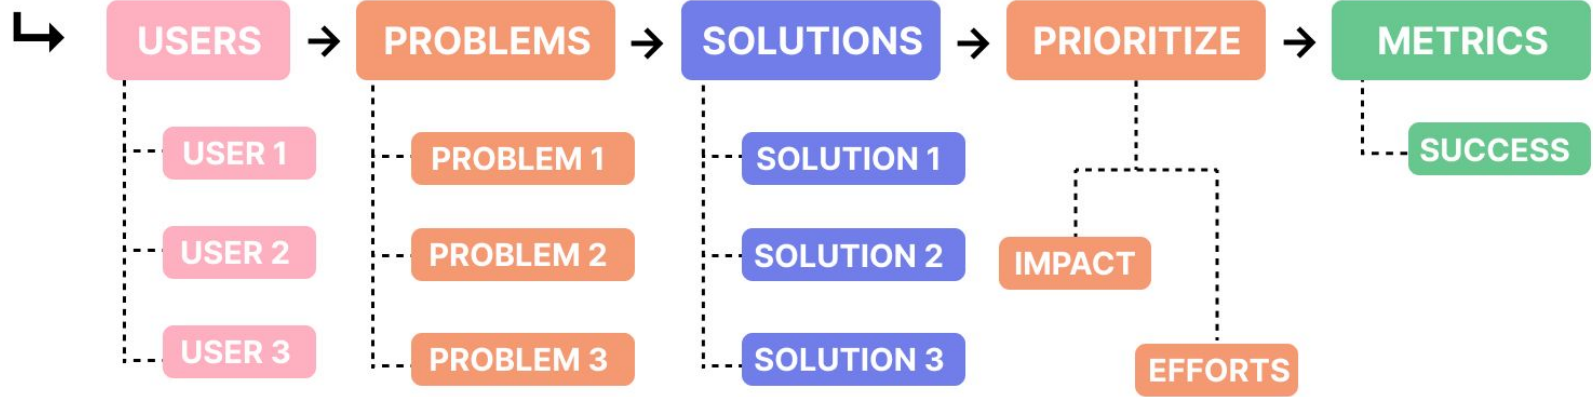

7 steps to product thinking

1. **Find Goals – Growth, Retention, Revenue, Engagement**
2. **Identify users – Label, Interest, Motivations, Context**
3. **Find their problems – Interviews, Analytics, Observations. Pains & Desires**
4. **Prioritize the problems – Alignment with goals, Importance.**
5. **Explore solutions – Have multiple**
6. **Prioritize solutions – Impact v/s Efforts**
7. **How would you know if its a right solution? – Metrics**
